

Environmental Policy

Rame and Stonehouse CDM recognises the need to operate the business in a manner which reflects good environmental management. This policy demonstrates our commitment to comply with all relevant environmental legislation and minimise pollution, resource use and waste, where feasible, through the continual improvement of performance in all areas of the Company.

The Company has demonstrated a commitment to identify all activities that have the potential to cause an environmental impact, as well as providing adequate resources to help minimise or prevent any negative impact.

In order to achieve this commitment, we will:

- Identify all environmental impacts that the Company contributes to and establish environmental management procedures that can be incorporated into all business decisions, in a cost effective manner
- Regularly measure and evaluate our environmental performance, and improve where necessary
- Consistently increase the awareness to ensure environmentally responsible concepts are integrated into normal working practices
- Identify and mitigate against potential accidents that could result in an environmental impact, so that if an accident did occur the consequences would be minimised
- Use products that have a negligible environmental impact, where appropriate options exist
- Reduce the consumption of resources (energy, materials, packaging), where feasible
- Minimise waste through a commitment to reuse, recover or recycle, where feasible

This policy, supported by the procedures and organisational arrangements in place, is to be applied to all activities and projects carried out by Rame and Stonehouse CDM.

The Managing Director, Steve Nicholson is responsible for the environmental performance of the company and signs this policy statement in acknowledgement of this.
